

AUTO TRIMMING

Features

- Servo motor drives module transmission, linear guide to ensure accurate and stable operation.
- Four edges cutting at the same time, the four corners adopt jacked suction cup structure.
- The blade adopts quick change structure, easy to replace.
- The blade adopts arc edge to cut clean, second trimming blade adopt straight blade to cut clean.
- The cut surface is smooth after trimming, which will not cause damage to the glass.

Functionality

- Alignment blocking: one side block, two sides alignment
- Tailing mode: electric roller clamp tailing
- Tape change time: $\leq 180s$
- Cycle time: $\leq 23s$
- Change over time: $\leq 20min$
- Fragment rate: $\leq 0.05\%$
- Operation mode: Auto/ Manual
- Noise level: $\leq 60dB$
- HMI: Chinese/ English mode
- Yield: $> 98.5\%$

Specifications

Item	Value
Model	SC-TR25-K8-01
Compatible module size	length: 1640-2550(mm); width: 950-1450(mm)
Cycle time	Vertical $\leq 19s$, horizontal $\leq 16s$
Air pressure	0.6-0.8(MPa)
Power	$\leq 2.2kW$
Dimension(LxWxH)	3200*2210*1620(mm)
